Sept

We are proud to be supporting Gas Safety Week 2021

Gas Safety Week is an annual safety week to raise awareness of gas safety and the importance of taking care of your gas appliances. It is coordinated by Gas Safe Register, the official list of gas engineers who are legally allowed to work on gas.

Badly fitted and poorly serviced gas appliances can cause gas leaks, fires, explosions and carbon monoxide (CO) poisoning. CO is a highly poisonous gas that can kill quickly and without warning, as you cannot see it, taste it or smell it.

By taking care of your gas appliances properly you are taking care of your home, your loved ones and even looking out for your local community.

Top tips on how to stay Gas Safe this Gas Safety Week:

- Know the symptoms of CO poisoning; headaches, nausea, breathlessness, collapse, dizziness and loss of consciousness.
- If you smell gas or think there might be a gas leak, call the free 24-hour national gas emergency number immediately on 0800 111 999.
- Never attempt to work on a gas appliance yourself, always seek the help of a qualified Aaron Services Gas Safe registered engineer who can work on your gas cooker, boiler or fire in a safe way.
- Always ask to see your engineer's Gas Safe ID card. Make sure you check the back of the card, which will state which gas appliances they are qualified to work on.
